Try a new approach to anti-ageing skincare – working from the inside

IMEDEEN® skincare tablets work in the dermal layer below the surface of the skin – where skincare creams cannot reach. It is here that the signs of skin ageing first begin. So add IMEDEEN skincare tablets to your daily beauty routine and enjoy the benefits of anti-ageing working from the inside.

- Reduces the appearance of fine lines and wrinkles
- Improves skin quality and moisture balance
- Helps protect collagen and elastin fibres against harmful UV rays
- Makes your skin feel softer and more supple
